

# Amazing ROI with supply hope

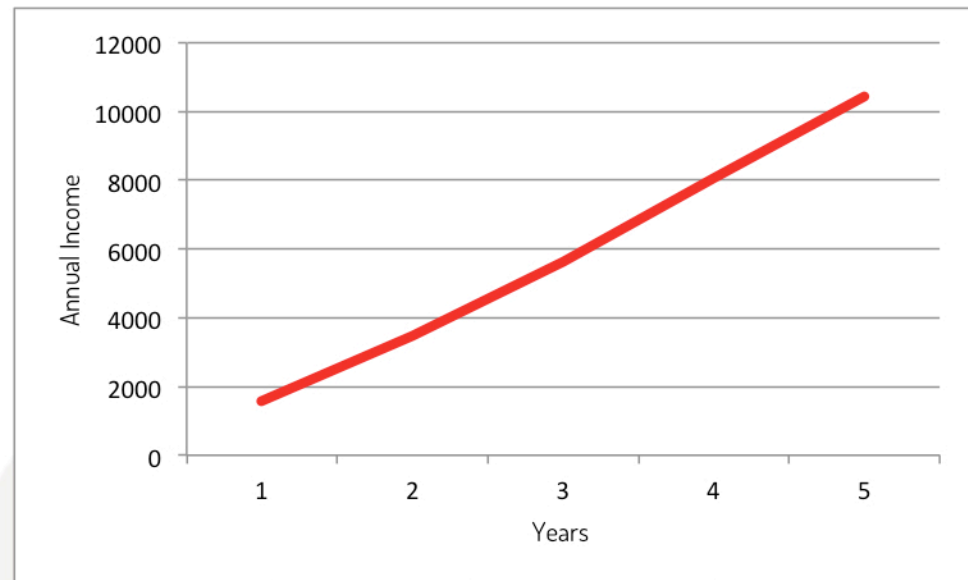

In the first year, the average store operator makes about \$5/day. If the store is open about 26 days/month, the total income in the first year is about \$1560

---

We have seen that incomes begin to rise after the first year of being a store operator and we expect them to continue to rise to an end goal of about \$7.80/day by the operator's 4th year in business

---

It only costs roughly \$1000 to start a new Mercado Fresco micro-franchise. After 5 years, the accumulative income earned for one family is projected to be around \$10,440

*One investment of \$1,000 yields up to \$10,440  
in accumulative income after only five years*
